

Simon and Charter

Become a living part of Simon Spies' tremendously festive and absolutely crazy universe!

Step onboard and become a part of this charter concept and get an experience that you will not forget right away. On this virtual journey there is something for those who loves recumbent pleasure and for those who seek the challenging excesses in the spirit of Simon Spies.

The event begins already at the entrance where an authentic security-check will send you on a safe journey far away from the daily round and bad weather. If the guests get through the security-check, they will be welcomed by e.g. Nordair officious stewardesses and accompanied to the departure hall where the luggage is taken care off before boarding.

The boarding passes are forwarded in advance, so when flight number NOVO2007 is announced, everybody is ready to board the plane towards Costa del Sol with the help and instruction by our helpful stewardesses.

With the help of sound, light and original effects from the aviation industry you'll step onboard a quite new type of aeroplane. There's a lot of room for your legs and it is allowed to smoke at the toilets. You will, of course, be welcomed by the captain who will also keep you informed during the flight.

Of course, there is no lack of liquor during the flight, so as soon as everyone has found their seats we start the simulation. The stewardesses will, in a more humorous way than normal, demonstrate the safety procedure onboard. During the flight it is possible to buy duty-free from the service trolleys and watch some of the in-flight movies.

At the destination a delicious Mediterranean buffet awaits you....or perhaps an overwhelming feast? Our staff will, of course, be dressed in original Simon Spies uniforms and will be ready to give their guests an unforgettable holiday. Anyhow, everything will be prepared for a party on this holiday evening. So get a hold on one of the tropic drinks and get ready to dance! The progress of the evening will be tailored to your wishes and budget.

The event can be combined with a challenging teambuilding-day inside the charming universe of the charter atmosphere. Here you will compete to become the best charter crew and participate in, more or less, crazy activities - all of them based on the staff or the guests' functions on a charter-vacation. There are plenty of possibilities - from flight simulator to the hunt for the missing suitcase and to the training of the noble art of bartending.

If you want to visit other destinations it is also possible to arrange for an intermediate landing: get your first course in Japan, second course in Italy and dessert on Hawaii.
