

Dolphins and killer whales

Vice Versa Event har fornøjelsen af at invitere jer med på en unik naturoplevelse omgivet af. Now you have the possibility to get close to some of the most exciting and admired animals in the world.

Vice Versa Event has the pleasure of inviting you on a unique experience in the nature surrounded by dolphins and killer whales.

The intensity of your meeting with these incredible creatures is up to you. Choose to stay on the boat or jump into the water with a snorkel and get a closer look.

We have very good experiences with this sort of event in connection with kick-offs and teambuilding, but we will, of course, adjust it to your wishes.

You could, for instance, travel to Norway during the winter season and get the tools to break down the traditional barriers in your company and create increased communication, while you get a close encounter with the killer whales. You will sleep onboard a ship anchored in Tysfjord from where you will go on expedition trips in order to meet killer whales.

If this trip sounds a bit too cold in your opinion, then we suggest you to visit the dolphins at the Red Sea in Egypt. At the same time you will get the opportunity to become acquainted with the Egyptian life style as you will be staying in a charming little hotel near a Bedouin settlement. The trip can be combined with a visit to the Colour Canyon where the peaceful atmosphere and colours from the rainbow in the valley invites to meditation.

Besides the above mentioned we can offer you a 1 day tour with overnight stay:

South of Stockholm it is possible to get a unique experience for everybody who wishes to get close to dolphins in a closed environment.

The day will start out with lunch. Then, you will learn more about dolphins and how they live. Afterwards you will get a wet suit and together with our experienced teachers dive into the salty water and look directly into the dolphins' eyes when they come to say hello.
