

Rivers & channels of Europe

Participate in a unique boat experience on the rivers and channels of Europe. You have the possibility to use the trip as a high-end client event, a teambuilding event or as the perfect setting for your conference.

You may choose between different countries such as France, Germany, Belgium, Italy, Spain or The Czech Republic. The different locations give you different opportunities for routes and stops. If you would like to make a field trip from one of the stops, we will arrange cars, busses or bicycles and take you to tourist attractions nearby.

You can choose between many different types and sizes of boats – from a small boat only for you and your clients to a bigger boat where there are plenty of space for the whole office.

Being on the river is a very relaxing experience and there will be plenty of opportunities to go for a swim or do some fishing from the boat. If you would like to be the “captain for a day” we can arrange for you to work with the real captain and see how he navigates the boat.

This is a unique experience that you and your colleagues or clients definitely will remember.
