

Movie Premiere

Give your employees or customers an extraordinary experience by inviting them to your very own movie premiere.

Why not combine a product launch and an upcoming movie premiere if the theme or title of the movie matches your product? We will make sure that the product launch, the food and the movie itself will go great together.

You can also use a movie premiere for the annual employee day with their families. Let us take care of the entertainment and meals either before or after the movie – of course for both adults and children.

To spice it all up we can combine the event with an autograph signing with one of the actors from the film.

You can also choose to let the movie be the kick-off for your gala party. After the movie you will be transported to a location nearby, where the food and decoration is in kept in the same style as the movie theme.

The possibilities are endless.
