

## High to fly

Discover the world in a bird's eye view together with your colleagues!

Join the flight and experience the joy of the skies, when you together with an experienced pilot by your side, live out the pilot dream.

Or join as passenger, while the pilot takes you through the air with all thinkable sky maneuvers regarding stunt flying - such as loops, rolls and upside down flying.

The dream of navigating an airplane is within reach when Vice Versa invites you and your company on a unique experience. You will be a part of a team, when experienced pilots take you on a flight school, where you among other things will be introduced to the concepts of stunt flying. You will also get the opportunity to try out you recently acquired knowledge. You can as an alternative lean back and join an unforgettable flight, where the balance will be challenge, when our pilots practice acrobatic flying exercises.

We start at the Hangar in Roskilde airport with a small breakfast/lunch followed by a welcome and introduction to the pilots. A common briefing, concerning the program of the day, together with an introduction in the current 'flying rules' and safety precautions, will be present just after the welcoming. Only when you're ready to control the airplane together with an instructor, you are ready to your first solo-flying with the instructor as a co-pilot. Alternatively you can lean back and let the instructor joggle with the airplane.

After an hour or so it's time to land in Roskilde airport.

When the balance has been challenged enough and everybody has gained stabile ground under the feet's, it's time to have coffee and cake. During this, a briefing of the adventure of the day will take place.

At the end of the day you will receive a proficiency certificate for your newly gained knowledge and courage.

It's possible to start and land 7 airplanes at the same time. You and your colleague can also set the variation of the flights, weather its solo flying or acrobatic stunt flying done by the pilot. It's up to you.
