

## Clear sightedness

Stress and rush are part of many people's life today, and the demand for absorption and personal reflections has increased – and not least alternative angles for personal development.

Forget your daily round and the hectic life at work for a couple of hours with this spiritual expedition where you will get the opportunity to gain an informal insight into these alternative tools in company with some of the best within these areas.

It is a very flexible concept and can be used in several different connections, and it is especially good in connection with team-building activities, parties or as a break during e.g. a seminar.

A possible scenario:

If you are arranging a party for your company, then start the evening with a glimpse into the world of hypnosis. It is a very good kick-starter and will get the full attention of the participants. Early in the progress you will find out who is receptive to the hypnotist's voice and who are able to resist his power.

During or after the dinner you will get the opportunity to explore our spiritual "oases": Pick a card at the tarot reader or let the fortune teller read your hand so that you can hear what the future brings you. If you are in need of some more clear-sightedness, then visit our clairvoyant or have your future read in coffee or tea grounds. If it has to be more "wild" and alternative, we will have our African voodoo specialist ready putting a spell on you or teaching you formulas.

The elements can be levelled to your needs and budget.

It will without doubt be an evening you will remember in a long time!
