

Conference

Planning and hosting a major activity such as a conference, a seminar or a kick-off meeting requires insight and experience – especially if you would like an optimal outcome. Vice Versa has 10 years of expertise in creating the right solution, so that you as a client can prioritize your precious resources and focus on the content and the participants.

Vice Versa has a great insight when it comes to conference and meeting facilities at hotels and conference centers in Denmark and abroad. We also offer alternative locations that you perhaps never would have considered.

By moving your conference to an alternative location, it is often possible to add an extra dimension, thus making it more interesting. It may even be possible to find a location that suits the content / theme of your conference.

We do not offer standard solutions. Instead we develop - in a close dialogue with you - the right solution for your conference. We offer you consulting, minor solutions for an already planned event or full-service solutions, where we take care of everything from invitations, registration and transport to accommodation, conference facilities, catering for hospitality staff, sound & lighting, teambuilding and social activities.

We look forward to helping you with your next event.
