

## Land Rover Experience

A Land Rover is made for both city and off road areas and makes it possible for you to drive almost all over the world.

It can manage almost everything!

All of it depends on the driver and, therefore, you!

Now, you have the opportunity to get behind the wheel in a Land Rover and test your own and the cars' limits to the maximum, when you in a challenging terrain pass obstacles and try to stay cool - despite of the adrenaline that are pumping through your body.

Before you get behind the wheel you will receive a thorough instruction on how to manoeuvre the Land Rover. If you still feel a little uncertain after the instruction, we give you the opportunity to be assisted by a co-driver on your first trip.

If you wish to compete against your colleagues' manoeuvre skills or race against time it is also possible.

The choice is yours!

We are ready to give you an unforgettable experience where pace and surroundings are up to you.
