

Model for a day

The participants will be in the hands of the most talented stylists, make-up artists, hairdressers and photographers in the business. You will go through a transformation that only few have the opportunity to do.

The event will start out with an introduction to the program of the day and an examination of the selected clothes. Afterwards, the participants' individually expectations and wishes for the final result will be discussed.

The participants are going to be styled and dressed in specially selected outfits, which will make the individual person unique and beautiful on the pictures. The make-up artists and the hairdressers change the look of the participants and make sure that the clothes fit perfectly. They magically create that "million look" that the participants did not know they had.

In order to crown the achievement, all the participants will receive a reward from the company: their pictures in the format 24x30. It is also possible to receive digitally pictures for usage on the intranet, web, etc.

The "Model of a day" concept can be used in many different ways. We have good experience using it for costumer / employee arrangements or as incentives.

From about 10 persons
