

Secrets of the rainforest

Welcome "in the open"! And why not arrange it in a warmer atmosphere than the one Denmark normally offers outside. At our indoor location you will be surrounded with trees and jungle sounds, while the play of the light in the treetops reflects on the tent canvas above your heads.

Before the event begins, we invite you to a shared drum experience with African drum players dressed in colourful costumes, whose dance, song and drums will take the participants on a musical and rhythmic experience.

Everybody will get to use their laughter and "drum" muscles, as you will get your own drum and try to keep up with the rhythm!

When you, after the drum séance, step into your safari tent in the green vigorous oasis, you will get the feeling of being somewhere else. All over the place you will be met by a close growth of trees and bushes.

If you wish to have dinner during this event, we will arrange for long tables with white clothes in the middle of the tent. On each long table there will be a running "brook" with tropical plants, fish and living candles, that floats among plants and fish.

Moreover, it will be possible to make a floating service by the water canals and make projections on the walls made by running water.

There are plenty of possibilities in the deep jungle.
