

## Magic and Mystery

What is real, what is false and what is pure magic? Vice Versa welcomes you and your colleagues to a unique and magical experience.

Anything can happen when you let a magician take control of your evening. Whether it is a classic show with all the familiar tricks - like "sawing a lady in half" or "the rabbit in the hat" - or magic in a whole new way, you never know what you will experience.

One thing is for sure - you will be lulled into the world of magic where you will be intrigued and puzzled by the impossible phenomena that is going to be unfolded in front of your own eyes.

Before dinner, you have the opportunity to experience close-up magic where the magician mingles with the guests and lets the magic unfold.

Another thing that is very popular is psychological magic. Through the power of manipulation the magician will twist the reality of one of the guests - so you will actually have the chance to take part in the show.

Of course, you also have the chance to get directly in touch with the magic world as the personal assistant of the magician. You might even learn a trick or two during the evening, which later can be shown on stage, for family or friends.

We welcome you to a day in the world of magic!
